github.com/Acexhat

Working on Web development technologies for the past 1.5 years also with a keen interest in Data Science. Excited to dive deeper into these domains with real-world projects integrating two or more technologies for a better future.

EDUCATION

B.TECH IN INFORMATION TECHNOLOGY
KIIT UNIVERSITY

06/2018 - Present   *8.66/10*

Courses
- Programming in C/JAVA/C++
- Operating System
- Database Management
- Computer Networking
- Software Engineering
- Data Structure

Intermediate in Science
RPS Public School

04/2016 - 04/2018

Courses
- Physics
- Chemistry
- Mathematics
- English

WORK EXPERIENCE

Member of Technical Staff
OpsVeda

06/2021 - Present   *Bangalore*

Achievements/Tasks
- Working as Full Stack developer with team to create product application which ease the user functionality
- Technology working on are **ReactJS**, **Node, Context-API , AmChart, Material-ui, SQL**

Software Developer Intern
HighRadius Corporation

01/2021 - 06/2021   *Bhubaneswar*
Fintech B2B company

Achievements/Tasks
- Working with Autonomous team to automate and ease the Order-2-cash Flow.
- Working on technology like **ReactJs , Redux-saga, HighChartJs,** and **SQL**

Placement Representative
KIIT UNIVERSITY

02/2020 - Present

SKILLS

Java | Servlet | JavaScript | ReactJS

Redux-Saga | RESTful Api | NodeJS/Express

Data Structure | MySQL/SQLyog | Material-ui

Python | Bootstrap | Numpy | Matplotlib

Scikit-Learn | Git version Control | Flask

PROJECTS

Call Workboard (04/2021 - 05/2021)
- Enterprise-level Application integrated with **React** and **Redux-saga** along with **Axios**
- For backend development used **NodeJs/ExpressJs**
- Made to ease the automation of any industry call workboard with **functionalities** like searching using **Debouncing**, Bot Drawer, Charts visualization using **HighChart** library

Invoice Management Dashboard (01/2021 - 03/2021)
- Worked with technologies like **React-Redux** and **Axios** to create UI
- Integrate the project with **SQL** using **Servlet** and CRUD Api for dynamic data manipulation

Flight Ticket Fare Prediction System (02/2021 - 02/2021)
- Predict the price of flight travelling from one place to another using Random-forest regressor
- Secured 22nd position on Kaggle https://www.kaggle.com/c/air-ticket-fare-prediction/leaderboard
- Worked with Libraries like **Scikit-learn** , **Numpy** and **matplotlib** for EDA

CHATTY (11/2020 - 07/2020)
- Web app based chat application using **ReactJS** Integrated with **Firebase** for user authentication and cloud storage.

PUBLICATIONS

Security in Big Data: A Succinct Survey (08/2020 - 11/2020)
~Research work on different security issues in big data along with the survey of various solutions to find an effective optimal result.
~Selected to publish in book series of Springer Publication
